Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language of claims 1, 9 and 16 is confusing. It appears that the Applicant is trying to claim the thread configuration. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8-10, 15-18 and 23-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Shapiro et al. (US 6,436,139).

Shapiro et al. disclose a threaded interbody spacer 10 with opposite lateral concave surfaces and a helical thread that tapers from a smaller diameter at the insertion end to a larger diameter at the opposite end (Figs. 1, 7 and 8, col. 3, lines 26-67 and cols. 4-8).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3732

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7, 11-14 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shapiro et al. (US 6,436,139), as applied to claims 1 and 19, in view of Michelson (US 6,120,503).

Shapiro et al. disclose all elements of the claimed invention except for an end cap member or stabilizing structure.

Michelson teaches an end cap or stabilizing structure 12 with wing portions (16, 17) and a resilient pawl 35 received in a recess 44 of a spinal implant to prevent rotation of the spinal implant and to prevent vertebral bodies from moving apart as the spine is extended (Fig. 9, col. 2, lines 27-58, col. 6, lines 46-67, col. 7 and col. 8).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided an end cap as taught by Michelson in the Shapiro et al. implant to prevent rotation of the implant of the combination of Michelson and Shapiro et al. and to prevent the vertebral bodies from moving apart as the spine is extended.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
